Email _____

Thank you for scheduling your consultation. Your appointment is (date / time)

Please print this questionnaire out and answer as many questions in advance as possible. Please also bring any photos, measurements, dimensions, sketches, etc that may be helpful.

Typically there are two reasons to plant:

- Either you have an area to enhance or
- You have a particular plant you want to incorporate into your landscape.

1. What reasons do you or your client have for planting?
2. What size is the space (total square footage, and shape)?
3. What specific plants are you considering (if any)?
4. Are there plants / colors you specifically don't want?
5. What qualities are you looking for in your specimen (centerpiece) plants: Evergreen or deciduous? Shade tree? Flowering? Fall color? Hedge or screening plant?

6. What size (height / width) do you want your tree/shrub to be in ten years?
7. What is your budget for this project? It is vital to have an idea of this to understand your needs. If need be divided into multiple stages of planting.
8. How much sun does the site you want to landscape receive? (Full, total shade, # of hours of sunlight?) Is it north, south, west, or east facing?
9. Does your city or community have any restrictions for plants and trees?
10. Are there any other site conditions to consider? As in sloped, wet location, power/under ground lines, large mature trees, deer, poor soils, windy knoll etc.
11. Will you be maintaining the landscape, or do you have a landscape maintenance service?
12. If planting in front of a structure what color is the structure?
13. What type of mulch, colored stone or ground cover is to be used?

Please contact us should you need to reschedule, or if you have any other questions.
